

ABSTRACT

A lighting fixture, in particular an exit sign luminaire or a similar instructive luminaire, which comprises a mounting housing (1) that is arranged to receive power supply (7) for a light source (5) of the luminaire and that is arranged for securing to a mounting base, such as a wall or a ceiling, and a sign part (2) that is arranged for securing in connection with the mounting housing (1). The mounting housing (1) is arranged to receive the light source (5) and the lighting fixture also comprises at least one optical fiber (6) arranged to transmit light, the first end (9) of which optical fiber is arranged in connection with the light source (5) in the mounting housing (1) and whose light-transmitting portion (8) is arranged in connection with the sign part (2) so as to illuminate it with light produced by the light source (5).
